I use this disinfecting spray all over my home.

It's great on **hard surfaces** (like countertops and doorknobs), but it also works great as a **fabric refresher (aka "Febreeze")**.

Here are just some of the places I use it:
- door handles
- light switches
- toilet handles
- faucets
- countertops
- trashcans
- remote controls
- furniture- sofas, chairs, and throw pillows (especially great after someone in family has been sick)
- stinky shoes and athletic gear
- mattress
- carpet & rugs

**Essential Oil Disinfectant Cleaning Spray Recipe**

1. fill a 16 oz glass spray bottle most of the way full with vodka
2. add the following essential oils
   - 30 drops tea tree essential oil
   - 15 drops lemon essential oil
   - 15 drops lavender essential oil
   - 15 drops eucalyptus essential oil
3. put on spray top and shake to mix well
4. add a label

How to Use

To Disinfect:
- pre-clean surface
- shake spray bottle each time before use
- spray directly on counter, faucets, doorknobs, etc. However, for remote controls, light switches and other electrical items, spray disinfectant onto cloth first and then wipe item with cloth
- leave surface wet for a few minutes and allow to air dry

To Control and Prevent Mold & Mildew:
- shake spray bottle each time before use
- apply to pre-cleaned surface (such as tile grout, shower wall, sink, etc)
- spray enough so that surface stays wet for at least 3 minutes
- let air dry
- use once a week or when mold and mildew growth appears

To Deodorize:
- shake spray bottle each time before use
- spray on surfaces as needed
- I spray in stinky shoes and on athletic equipment, and then allow to air dry overnight
- I spray in and around trashcans

To Spot Sanitize, Deodorize & Refresh Fabrics (aka Febreeze):
- shake spray bottle each time before use
- spot test on fabric in an inconspicuous spot
- spray until fabric is slightly damp, but not overly wet
- fabric should remain wet for 30 seconds.
- let air dry
- for difficult odors, reapply
